# 21E Black Painted Face Installation Instructions (sku 95600909)

## Packing List

- (4) Magnets
- Face

## Face Installation

Place two magnets on each side of the fireplace as shown below. Position the face so the bottom brackets insert into the slots on the lower support legs (see illustration below). With the brackets inserted, rotate the face forward until the magnets hold the face in place.

**WARNING:** The powerful magnets may require pliers to properly position. Take care with the magnets to prevent damage. Keep the magnets away from children.
